

GSM AUTO-DIALLER

Remote Monitoring & Control Using Your Mobile Phone

FEATURES

- GSM frequency
Quad band 850/900/1800/1900 MHz
- Power supply voltage : 9-18 Vdc 1Amp max.
- Current used in standby mode : 25mA max.
- IP65 enclosure rating for outside installation
- 2 digital inputs (Negative or Positive triggered)
- 10Amp relay output
- Standard 2G simcard
- No landline required
- Operating temperature : -10°C - +40°C
- Input 1 : SMS Text alert, maximum 3 numbers
Input 2 : Dial out alert, maximum 3 numbers
- 3m extension aerial standard

APPLICATIONS

- Turn pumps, electric fences, etc off and on with your cellphone
- Open/close security gates with your cellphone
- Where systems have an alarm output, such as the Kelco F29 or F60 controllers, you can receive an alarm text if a fault occurs within the system; eg. If the pump runs dry

INTRODUCTION

This GSM Auto-Dialler is a versatile unit which can be attached to your Kelco pump controller, or many other electronic devices. It will alert you using GSM technology and send you a text message, or call you, straight to your mobile phone or landline so you know immediately if there is any problem/failure/status change in your system – wherever you are in the world !

Having both inputs and outputs, you can set up the unit so that you can send a command back to the equipment. For example, you get a text saying your pump has stopped - you can send back a signal to restart the pump. The unit can also be used to switch the pump off remotely while making repairs, and back on when completed, using your phone.

The unit is enclosed in an IP65 rated box, meaning it is suitable for outside installation.
